(Digital) Footprint, Profiling, and Surveillance

(數位)足跡、剖繪、與監控

2020-06-29 @ National ID Study Group

Tyng-Ruey Chuang 莊庭瑞

Concepts

- Surveillance 監察、監視、監控
- Persistent Identifiers 持續指稱符號(固定識別碼)
- Profiling 剖析、描繪
- Footprint / Trace 足跡
- Resources
 - Wikipedia!
 - TAHR, Taiwan Association for Human Rights
 - 隱私權專題 https://www.tahr.org.tw/issues/privacy
 - TAHR PAS 2014 春季號:數位時代公民權 https://www.tahr.org.tw/publication/1369
 - EFF, Electronic Frontier Foundation https://www.eff.org/
 - Course materials for Mass Surveillance and Personal Data Protection (co-teach with Wentsong Chiou and Ching-Yi Liu), National Taiwan University, Fall 2014

https://www.iis.sinica.edu.tw/~trc/public/courses/MassSurveillance2014F/

Surveillance 監察、監視、監控

- Time duration, spatial extent, sizable population, fine resolution, long-term archive, on-demand analysis
- Surveillance can be on a group, on a target, or on an unknown
- Surveillance is done by governments, corporations, and individuals
- Surveillance can be mutual, e.g. use of Amazon Ring in a community
- Cross-breeding, e.g. Amazon Ring and police departments
- "Collect it all, do it now, and keep it forever!"
- Power asymmetric in surveillance
- Surveillance leads to behavior change and coercion

Persistent Identifiers (PIDs)

- PIDs link together multiple entities, cross-reference various attributes
- PIDs of things: phones (IMSI/IMEI), IP addresses, MAC addresses, car license plate numbers, e-payment card numbers ("anonymous" or not)
- PIDs relating to people: national IDs, credit cards, bank accounts, etc.
- PIDs relating to people: login names, social media handles, nicknames
- PIDs of activities: transaction records, series numbers, etc.
- PIDs are machine readable and embedded in daily activities

Profiling 剖析、描繪

- Profiling on a group, on a target, or on an unknown
 - What can be known and inferred about a subject based on the data already collected about him/her/them?
 - How can these profiles be used for profits (or against the subjects)?
- Profiling based on data collected from shopping and consumption behaviors, social media and interactions, transportation habits, etc.
- (conceptual) comprehensive surveillance vs. fragmentary profiling
- (pragmatic) PIDs interlink various profiles from multiple sources

Digital Footprint 數位足跡

- Digital footprints are embedded with PIDs
- Interlinked PIDs leads to accurate profiling
- Large-scale accurate profiling is surveillance
